Middle Level Math Placement Test

Math 5 Readiness through Algebra 1 Readiness Diagnostic

Name: _____

Date: _____

Directions. Work carefully and show enough work to support your answers. Do not use a calculator unless your instructor allows it. This diagnostic is designed to identify the strongest appropriate starting level: Math 7, Math 8, Algebra 1/2, Algebra 1, or additional advanced assessment.

Teacher Use. The test is organized in five 20-question bands. A student normally moves to the next readiness band only after scoring at least 16 correct in the current band. Use written work, speed, independence, and error pattern as supporting evidence.

Placement Guide

How to read the result. Each band contains 20 questions. A score of 16 or more in a band indicates readiness to attempt the next band. Final placement should also consider pacing, shown work, arithmetic fluency, and whether mistakes are conceptual or careless.

Score Pattern	Suggested Placement Interpretation
≤ 15 correct on Questions 1–20	Review Math 5 foundations before moving ahead.
≥ 16 correct on Questions 1–20	Student may begin Math 6 readiness material.

Study Plan by Diagnostic Band

Purpose. Use this plan after grading the placement test. The lesson counts below assume 60–75 minute one-on-one or small-group classes. Increase the count if the student shows weak written work, slow computation, or repeated conceptual errors.

Diagnostic Result	Suggested Plan	Main Focus
Not ready for Math 6	20–28 lessons	Whole-number operations, place value, long division, money/measurement, basic fractions, perimeter/area, and word-problem translation.
Ready for Math 6	12–16 lessons	Fraction operations, decimal operations, ratios, percent foundations, estimation, multi-step arithmetic, and geometry vocabulary.
Ready for Math 7	16–22 lessons	Fraction/decimal/percent fluency, rates, proportions, signed-number readiness, exponent/order of operations, area/volume, and equation setup.
Ready for Math 8	18–24 lessons	Proportional reasoning, percent change, probability, unit conversion, variable expressions, formulas, exponents, roots, and multi-step word problems.
Ready for Algebra 1/2	20–28 lessons	Linear equations, ratios and rates, algebraic translation, integer/rational operations, scientific notation, geometry formulas, and complex order of operations.
Ready for Algebra 1	8–12 lessons maintenance or extension	Algebra 1 bridge: linear equations, slope/intercepts, graphing readiness, systems foundations, exponent laws, radicals, and advanced word problems.

Module Map.

- **Arithmetic Fluency:** whole-number operations, long division, decimal operations, fraction computation.
- **Ratio and Percent:** rates, unit price, percent increase/decrease, proportions, probability.
- **Geometry and Measurement:** perimeter, area, volume, surface area, unit conversion, coordinate/diagram interpretation.
- **Pre-Algebra:** variables, equations, formulas, signed-number readiness, order of operations, exponents, roots.
- **Algebra Readiness:** algebraic translation, multi-step equations, scientific notation, rational expressions, complex word problems.

Recommended Placement Workflow.

1. Grade by 20-question bands first; do not rely only on total score.
2. If a student scores 16–17 in a band, review written work before moving them up.
3. If a student scores 18–20 in a band but work is slow or disorganized, place them in the next level with a short bridge unit.
4. If a student passes the Algebra 1/2 band comfortably, give a separate Algebra 1 diagnostic before placing into a full Algebra 1 course.
